Position: **Director SOC Gastroenterologia Oncologica Sperimentale**
Tel. **0039 0434659281** Email: rcannizzaro@cro.it

General description of Hospital

The Oncological Referral Center (CRO), IRCCS, of Aviano, Italy is a Scientific Institute for research, hospitalization and health care, highly specialized cancer center of national importance.

CRO Aviano is dedicated to the development of excellence in the prevention, diagnosis, and treatment of cancer and rehabilitation of patients after cancer care, through multidisciplinary and integrated patient care, preclinical and translational research, graduate education, and patient empowerment programs.

The clinical activity focuses on medical treatment of the most frequent solid tumors, including rare neoplasias, and haematological neoplasias, oncological gastroenterology, oncological surgery, conformal, intra-operative, stereotactic radiotherapy and IMRT. Clinical research is based on mono- and multidisciplinary therapeutic protocols.

University hospital	<input type="checkbox"/>	total number of beds	130
University affiliated hospital	<input checked="" type="checkbox"/>	beds dedicated to GI oncology:	20

Host profile:

Gastroenterologist, Surgeon, Medical Oncologist

Facilities

The research environment at the CRO National Cancer Institute offers graduate students a wealth of opportunities to advance their education. The newest tools in biomedical research are readily available and multidisciplinary research is fostered.

Multidisciplinarity

- Specialities available: **Surgery, Medical Oncology/GI Oncology, Gastroenterology, Pathology, Radiology, Radiation Therapy**
- The trainee can frequently participate in multidisciplinary team meetings

Supervision

- The trainee can frequently participate in operations with his/her tutor
- The trainee can frequently participate in outpatient clinics with his/her tutor

Please note: according to its profile, this institute preferably hosts surgeons (with GI focus) / medical oncologists / gastroenterologists

Additional comments:

The Oncological Gastroenterology Division is engaged in assistance and research activities pertaining to preventive, diagnostic and therapeutic functions for primitive and secondary neoplasms of the gastrointestinal tract. Diagnostic endoscopies of the superior digestive tract, diagnostic endoscopies of the inferior digestive tract, ultrasound endoscopies, therapeutic procedures, gastroenterological consultations and functional tests, are performed for inpatients and outpatients. Particular attention is devoted to echo-endoscopic staging with FNAB of digestive cancer, enteroscopy with pillcam and device-assisted, endomicroscopy with pCLE, EMR and ESD, percutaneous endoscopic gastrostomy for decompression and nutritional purposes, prothesis, and APC treatments.
